

A CRM Application to Manage the Services offered by an Institution

In Salesforce, a CRM (Customer Relationship Management) application is a software tool designed to help institutions manage and streamline their customer interactions, sales processes, and service offerings. It provides a centralized platform for tracking and analyzing customer data, automating sales and service workflows, and enhancing communication with clients. This allows institutions to improve their customer relationships, increase efficiency, and drive growth by leveraging insights and automating routine tasks.

EduConsultPro Institute is a leading educational institution offering a variety of courses and programs in diverse fields. With a growing number of prospective students seeking admission each year, the institute faces challenges in managing the admission process, students enquiry, and expert consulting services efficiently. To address these challenges, EduConsultPro Institute decides to leverage Salesforce CRM to streamline the admission process and enhance the overall experience for both students and admissions staff.

The use case focuses on the admission process for prospective students interested in enrolling in courses and programs offered by EduConsultPro Institute. The goal is to provide a seamless and transparent experience for students while enabling admissions staff to efficiently review and process admission applications, students enquiry and case management.

> Requirements

1. Admission Application Management:

Prospective students should have access to the admission application form through the institute's website or portal. The admission application form should collect comprehensive information including personal details, academic history, and qualification. Submitted admission applications should be captured and stored in the Salesforce CRM system. Students should receive automated email notifications after successful submission of application. Admissions staff should be able to generate reports and dashboards to analyze application metrics, acceptance rates, and enrollment trends.

2. Approval Process Requirements :

Implement an Approval process in Salesforce to review and approve Consulting Request. Set up email alerts to notify relevant students when he/she is approved or rejected. Ensure that request gets automatically submitted when it is created.

3. Consulting Services Management:

Prospective students should be able to request consulting services through the institute's website or portal. The consulting request form should capture student details, consulting preferences, and areas of expertise required. Submitted consulting requests should be recorded in the Salesforce CRM system. Consultants and advisors should receive automated email notifications for new consulting requests. Consultants should be able to view, accept, and manage consulting requests within the Salesforce CRM interface. Consulting appointment scheduling should be facilitated within Salesforce, including date, time, and purpose of the appointment. Appointment status (e.g., scheduled, completed, canceled) should be tracked and updated in Salesforce.

4. Immigration Case Management:

Students should be able to initiate immigration cases through the phone, email or web. The immigration case submission form should capture case details, and relevant information. Submitted immigration cases should be recorded and stored in the Salesforce CRM system. Immigration agents and case managers should receive automated email notifications for new immigration cases. Immigration agents should be able to view, process, and track immigration cases within the Salesforce CRM interface. Case status (e.g., open, in progress, closed) should be tracked and updated in Salesforce. Document management and collaboration tools should be integrated to facilitate case processing and communication.

> Create Objects from Spreadsheet

Directly Creating Objects from Spreadsheet in Salesforce

Create Course object

1. Go to your object manager and click on create object from spreadsheet
2. Click on the link to get the spreadsheet, Course.
3. After downloading, upload the file, map the fields and upload to create an object.

Create Remaining objects

1. Follow the steps which we have followed for course object creation.
2. Use the following sheets for remaining objects.
 - a. Consultant
 - b. Student
 - c. Appointment

Create Relationship among the objects

1. Create lookup between appointment and student, appointment and consultant.
2. Create an object to store the information student and course details with the name Registration.
3. Also create a lookup between student and case to store the student queries for immigration or visa application.
4. The data model should be similar to the below Data Model with fields & relationships:

5. Create tabs for the respective object.

Configure the Case Object

1. Go to object manager, edit case object.
2. Select the “Type” field and add the values in it.
 - a) Immigration
 - b) Visa Application
3. Now Select the “Status” field and add the values in it.
 - a) Open
 - b) In-progress

Create a Lightning App

1. Go to Setup, search for the App Manager in quick find
2. Click on New Lightning App
3. Give app name as “EduConsultPro”, click Next, Next, Next
4. Add Home, Students, Courses, Consultants, Appointments, Registrations, and Cases from the Available Items to Selected Items.
5. Add “System Administrator” profile from Available Profiles to Selected Profiles, click Save & Finish.

> Create a ScreenFlow for Student Admission

Application process.

Creating a ScreenFlow for a student admission application process involves outlining the key steps and interactions that students will follow to complete their application. This flowchart will help visualize the process and ensure a smooth user experience.

Add Screen Element

1. From Setup, enter Flow Builder in quick find, select new flow --> ScreenFlow.
2. Add a Screen element.
3. In the Screen Properties pane, for Label, enter “Student Info”.

- Click on Fields, click on the record variable input and create a new Resource(StudentRecordRes) to display all the fields which are in the student object. Drag all the fields which are needed to add on the screen inorder to collect the student information.

Create Student Record using Create Element

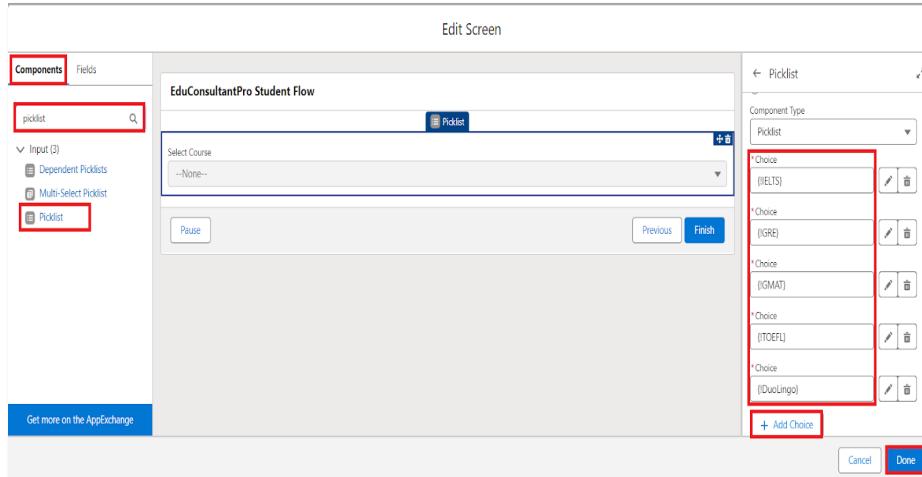

- Add a Create element after Student Info Screen Element, Label it as “Create Student Record.”
- Select “one” under How many records to Create, and select “use all values from a record” under How to Set the record fields.
- Select the record variable resource(StudentRecordRes) which we have created in the Student Info screen element, under Create a record from these values.

New Create Records

* Label	* API Name
Create Student Record	Create Student Record
Description	
<p>How Many Records to Create</p> <input checked="" type="radio"/> One <input type="radio"/> Multiple	
<p>How to Set the Record Fields</p> <input checked="" type="radio"/> Use all values from a record <input type="radio"/> Use separate resources, and literal values	
Create a Record from These Values	
<p>* Record</p> <input type="text" value="StudentRecordRes X"/>	
Make sure that ID is blank. After the flow creates the records, ID is set to match the record that was created. <small> ⓘ</small>	

Add Screen Element

1. Add a Screen Element after Create Student Record Element and label it as Course Screen.
2. Add a picklist component from the left side panel label it as “Select Course”, under choices type “IELTS” and enter. This creates a variable with the name IELTS.
3. Repeat the same for GRE, GMAT, Duolingo, TOEFL.

Add Decision Element

1. Add a Decision Element after Select Course Screen Element, label it as Selecting Course.
2. Under outcome label it as “Selected IELTS” and write the condition such as below:

Resource : Select_Course (Screen Component from Select Course Screen Element)

Operator : Equals

Value : IELTS (Choice Variable from Select Course Screen Element)

3. Click on the “+” icon and Repeat step 2 for other options mentioned as below:
 - a. GRE
 - b. GMAT
 - c. DuoLingo
 - d. TOEFL
4. Click Done.

Add GET Record Element

1. Add a GET Record Element after Decision Element, under the IELTS path and label it as “Get IELTS Rec”.
2. Select Object : Course
Condition Requirement : All Conditions are Met(AND)
 - a. Field : Course Name
Operator : EqualsValue : {!Select_Course}

The screenshot shows the configuration of a 'Get Records' element. The 'Label' field is 'Get IELTS Rec' (highlighted with a red box). The 'API Name' field is 'GetIELTS_Rec'. The 'Object' field is 'Course' (highlighted with a red box). The 'Condition Requirements' dropdown is set to 'All Conditions Are Met (AND)' (highlighted with a red box). Below this, there is a table for 'Filter Course Records' with one row: 'Name' field, 'Equals' operator, and 'Value' '{!Select_Course}' (highlighted with a red box).

3. Repeat the steps 1 & 2 for the GRE, GMAT, TOEFL, DuoLingo paths.

Create Registration Record using Create Records Element

1. Add a Create element after the Get IELTS Rec element and label it as “Create IELTS Registration Rec”.
2. Select “one” under How many records to Create, and select “Use separate

resources, and literal values" under How to Set the record fields.

3. Select Object : Registration

a) Field : Course_Name__c

Value : {!GetIELTSRec.Id}

b) Field : Student_Name__c

Value : {!StudentRecordRes.Id}

Dear {!StudentRecordRes.Name},

Congratulations and welcome to EduConsultantPro!

We are delighted to inform you that your registration on our platform has been successfully completed. You are now part of our esteemed community dedicated to empowering students like you to achieve their educational and immigration aspirations.

At EduConsultantPro, we understand the importance of your academic and career goals, and we are committed to providing you with the highest level of support and guidance throughout your journey.

Here are a few key points to help you get started:

4. Repeat steps 1 & 2 to create an email text template for the email subject, label it as "StuRegistrationEmailTextTempSub", write a text message in the body and save it.

Add an Action Element

1. Add an Action Element after all the Decision paths, label it as “Send Email to Student”.
2. Under “Set input values for selected action”, include body, Recipient Address List and Subject.
3. For input Body : {!StuRegistrationEmailTextTempBody}, Recipient Address List : {!StudentRecordRes.Email__c}, Subject : {!StuRegistrationEmailTextTempSub}.

Edit Send Email
Send Email to Student (*Send_Email_to_Student*)

* Label

* API Name

Description

Set Input Values for the Selected Action

A_a Body <small>i</small>	<input type="text" value="{!!StuRegistrationEmailTextTempBody}"/>	<input checked="" type="checkbox"/> Include

A_a Subject <small>i</small>	<input type="text" value="{!!StuRegistrationEmailTextTempSub}"/>	<input checked="" type="checkbox"/> Include

Add Screen Element

1. Add a Screen Element after the Send Email to Student Action Element, label it as Success Screen.
2. From the left side panel search for the Display text component and drag it to the main panel, label it as “SuccessMessage”.
3. Paste the below in the Resource picker box.
“Dear {!StudentRecordRes.Name},

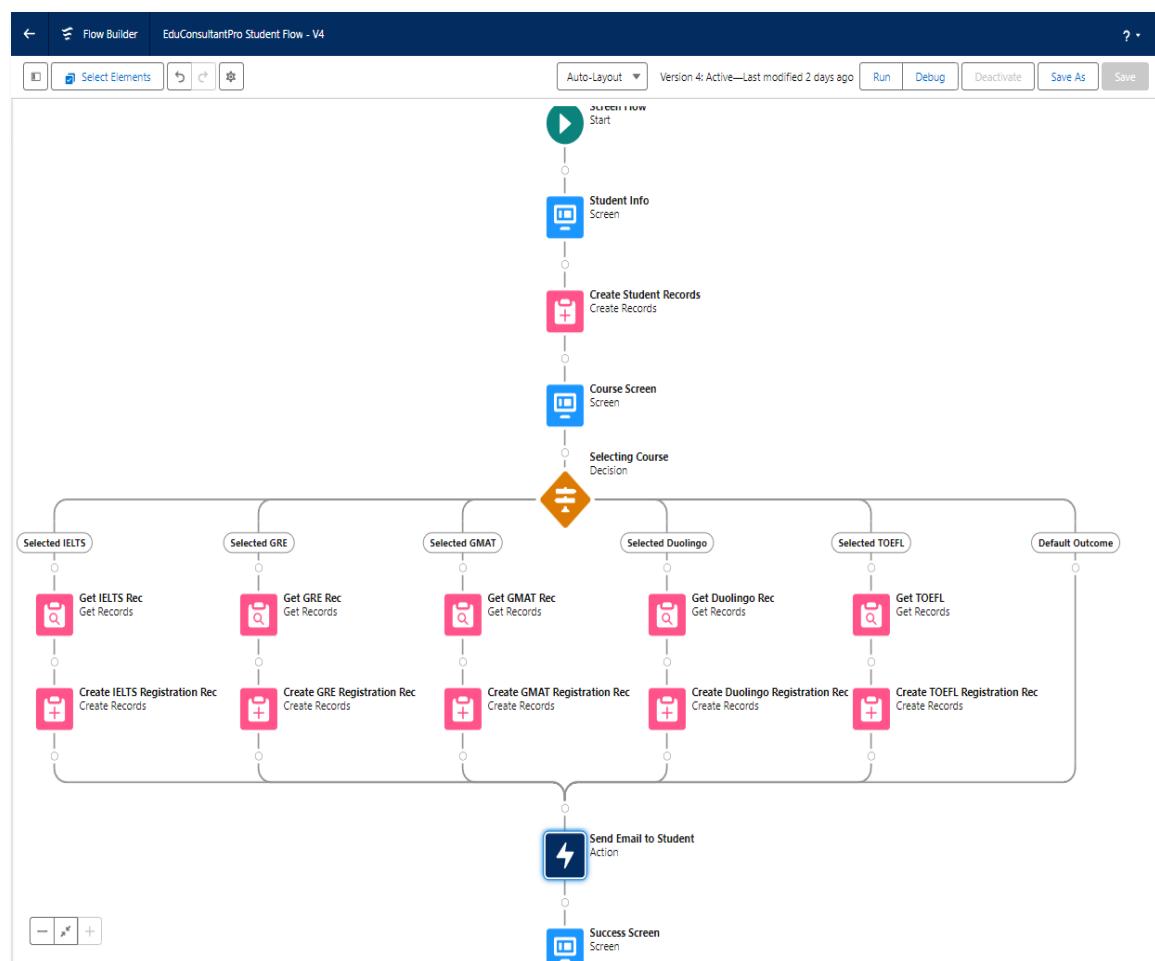

Congratulations and welcome to EduConsultPro!

We are delighted to inform you that your registration on our platform has been successfully completed. You are now part of our esteemed community dedicated to empowering students like you to achieve their educational and immigration aspirations.

Your Registration details have been sent through mail kindly check it once.

Thank you.”

4. Click Done.
5. Save the flow and name it as “EduConsultPro Student Flow”. Your flow will look as shown below:

> Create Users

Create a user with a Standard platform user profile.

User

1. Go to Setup --> Administration --> Users --> New User
2. LastName : Consultant
3. License : Salesforce Platform
4. Profile : Standard Platform User
5. Fill all the mandatory fields & Save.

Configure the User Settings

1. Go to Setup --> Administration --> Users --> click Edit next to your name
2. Scroll down to bottom, under Approver Settings, Select “Consultant” the Manager Field.
3. Click Save.

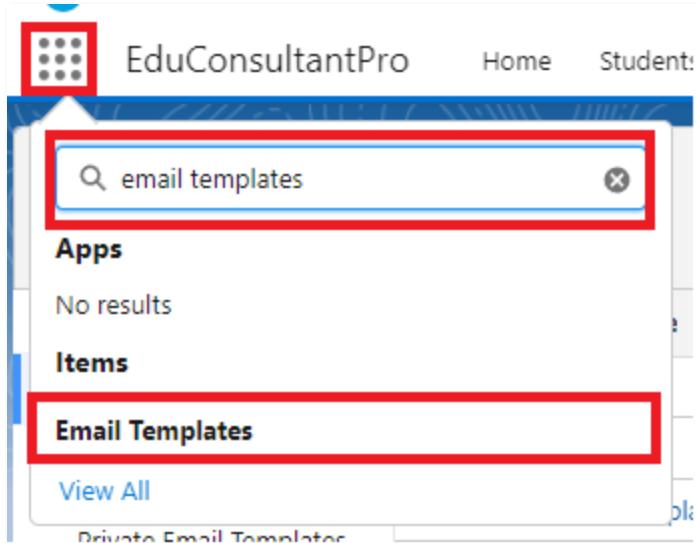

The screenshot shows the 'Approver Settings' section of the Salesforce User edit screen. It includes fields for 'Delegated Approver' (with a lookup icon), 'Manager' (set to 'Consultant' with a dropdown arrow icon), and 'Receive Approval Request Emails' (set to 'Only if I am an approver'). At the bottom, there are three buttons: 'Save' (highlighted with a red box), 'Save & New', and 'Cancel'.

> Create an Approval Process for Property Object

1. **Submission:** Property details and required documents are submitted by the owner.
2. **Preliminary Review:** Initial check for completeness and accuracy of the submission.
3. **Compliance Check:** Verification of legal status and regulatory compliance.
4. **Final Review:** Comprehensive review by a senior authority for approval.
5. **Notification:** Inform the submitter of the approval decision, with feedback if needed.

Create an Email Template

1. From Setup, enter Templates in the Quick Find box, and then select Lightning Email Templates, toggle on.

2. go to app launcher, search for “Email Templates”, Create a new folder with the desired name.
3. Then create a new email template, select the folder which we have created in the previous steps, enter the below text in the HTML Value and Save it as "Submission Template".

"Dear {{{Appointment__c.Student_Name__c}}},

I hope this email finds you well. I am writing to confirm the details of our upcoming appointment scheduled for

{{{Appointment__c.Appointment_DateTime__c}}} regarding
{{{Appointment__c.PurposeTopic__c}}}.

Appointment Details:

Appointment No : {{{Appointment__c.Name}}},

Student Name : {{{Appointment__c.Student_Name__c}}},

Consultant Name : {{{Appointment__c.Consultant__c}}},

Date & Time : {{{Appointment__c.Appointment_DateTime__c}}},

Purpose : {{{Appointment__c.PurposeTopic__c}}}

I want to assure you that I am looking forward to our meeting and am fully prepared to address any questions or concerns you may have regarding {{{Appointment__c.PurposeTopic__c}}}. Your success and satisfaction are my top

priorities, and I am committed to providing you with the guidance and support you

If you have any specific topics or questions you would like to discuss during our appointment, please feel free to share them with me in advance. This will help ensure that our time together is as productive and beneficial as possible.

If for any reason you need to reschedule or cancel our appointment, please notify me at your earliest convenience so that we can make alternative arrangements.

Once again, thank you for choosing to work with me on this matter. I am confident that our collaboration will lead to positive outcomes and progress toward your goals.

If you have any questions or require further information before our scheduled appointment, please don't hesitate to reach out to me.

Looking forward to our meeting.

Best regards,

{{{Recipient.Name}}},

EduConsultantPro"

4. Create two more Email templates for Approval and Rejection of Request similar to the previous one.

Create an Approval Process

1. From Setup, enter Approval in the Quick Find box, and then select Approval Processes.
2. In Manage Approval Processes For, select Appointment.
3. Click Create New Approval Process --> Use Jump Start Wizard.
4. Configure the approval process.
5. Process Name - Appointment Approval, Under Select Approver, Select Manager for the option : “Automatically assign an approver using a standard or custom hierarchy field.”

The screenshot shows a configuration interface for selecting an approver. At the top, a button labeled "Select Approver" is highlighted with a red box. Below it, a note says "Using the options below, specify the user to whom the approval request should be assigned." There are four radio button options: "Let the submitter choose the approver manually." (unchecked), "Automatically assign an approver using a standard or custom hierarchy field." (checked and highlighted with a red box), "Automatically assign to queue." (unchecked), and "Automatically assign to approver(s)." (unchecked). To the right of the third option is a dropdown menu set to "Manager". Below this section is a note: "Because this is the Jump Start Wizard, Salesforce automatically chooses some settings for you. [Show More](#)". At the bottom are "Save" and "Cancel" buttons, with "Save" also highlighted with a red box.

6. Click next and “Next Automated Approver Determined By” --> Select Manager.
7. From Record Editability Properties --> Click on Administrators OR the currently assigned approver can edit records during the approval process.
8. Save the approval process.
9. Click View Approval Process Detail Page.
- 10.Under Initial Submission Actions, click Add New --> Field Update, and configure it with these values.

Field	Value
Name	Submitted
Field to Update	Appointment: Status
A Specific value	Pending

Initial Submission Actions		Add Existing	Add New
Action	Type	Description	
Record Lock		Lock the record	Task
			Email Alert
			Field Update

11. click Add New --> Email Alert, and configure it with these values.

Description : Submission Email Alert

Unique Name : Auto Populates

Email Template : Submission Template

Recipient Type : Select your Name

12. Repeat the Steps 10 - 11 for Final Approval and Final Rejection actions.

> Create a Record Triggered Flow

- Trigger Event:** The flow is triggered when a record is created, updated, or deleted.
- Decision Logic:** The flow evaluates specific conditions or criteria based on the record's data.
- Automated Actions:** Depending on the outcome, the flow performs actions like updating records, sending notifications, or creating tasks.
- Completion:** The flow ends after executing the necessary actions based on the decision logic.

Configure the Start Element

- From Setup, enter Flows in the Quick Find box, then select Flows.
- Click New Flow.
- Select Record-Triggered Flow.
- Click Create. The Configure Start window opens.
- For Object, select Appointment.
- For Trigger the Flow When, select A record is created. The flow will look like this:

Select Object

Select the object whose records trigger the flow when they're created, updated, or deleted.

* Object
Appointment

Configure Trigger

* Trigger the Flow When:
 A record is created
 A record is updated
 A record is created or updated
 A record is deleted

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. Minimizing unnecessary flow executions helps to conserve your org's resources.

If you create a flow that's triggered when a record is updated, we recommend first defining entry conditions. Then select the **Only when a record is updated to meet the condition requirements** option for When to Run the Flow for Updated Records.

Condition Requirements
None

* Optimize the Flow for:

Fast Field Updates
Update fields on the record that triggers the flow to run. This high-performance flow runs *before* the record is saved to the database.

Actions and Related Records
Update any record and perform actions, like send an email. This more flexible flow runs *after* the record is saved to the database.

Include a Run Asynchronously path to access an external system after the original transaction for the triggering record is successfully committed

Add an Action Element

1. Add an Action element after the Start Element and Select the Submit for approval action, label it as "Approval SubFlow".
2. Set the RecordId to "{!\$Record.Id}".

Edit Submit for Approval approval subflow (approval_subflow)

* Label
approval subflow

* API Name
approval_subflow

Description

Use values from earlier in the flow to set the inputs for the "Submit for Approval" core action. To use its outputs later in the flow, store them in variables.

Set Input Values for the Selected Action

Aa * Record ID 

{!\$Record.Id}

Aa Approval Process Name Or ID

Don't Include

Aa Next Approver IDs

Don't Include

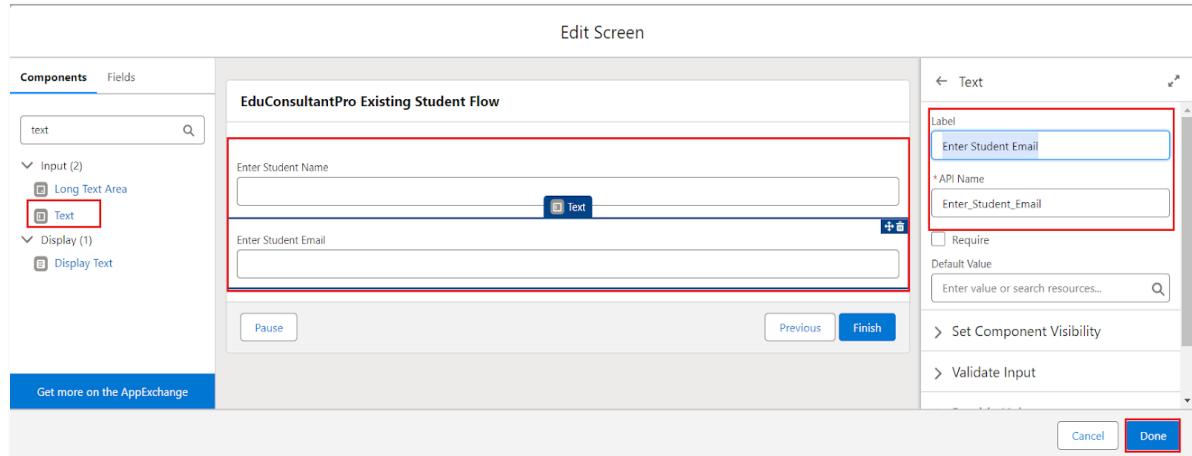

3. Save the Flow, label it as "EduConsultPro Approval Flow and Click on Activate

> Create a ScreenFlow for Existing Student to Book an Appointment

- 1. Student Verification:** The flow begins by verifying the student's identity using their student ID or credentials.
- 2. Appointment Details:** The student selects an appointment type, date, and time from available options.
- 3. Confirmation:** The flow displays a summary of the booking details for the student to confirm.
- 4. Completion:** After confirmation, the appointment is booked, and a confirmation message or email is sent to the student.

Add Screen Element

1. From Setup, enter Flow Builder in quick find, select new flow ? ScreenFlow.
2. Add a Screen element.
3. In the Screen Properties pane, for Label, enter “Get Student Info”.
4. Add two Text components from the left side panel. Give the Label's as follows:
1st Text Component Label : Enter Student Name
2nd Text Component Label : Enter Student Email

5. Click on Done.

Add GET Record Element

1. Add a GET Record Element after Decision Element, under the IELTS path and label it as “Get Rec”.
2. Select Object : Student

Condition Requirement : All Conditions are Met(AND)

a) Field : Student Name

Operator : Equals

Value : {!Enter_Student_Name}

B Field : Email_c

Operator : Equals

Value : {!Enter_Student_Email}

 Edit Get Records
Get Rec (Get_Rec)

+ Add Condition

Add Decision Element

1. Add a Decision Element after Select Display Student Details Element, label it as "Appointment or Case".
2. Under outcome label it as "Appointment" and write the condition such as below:
Resource : {!How_may_I_Help_you}
Operator : Equals

Value : {!Book_an_Appointment}

- Click on the “+” icon and Repeat step 2 for Case options mentioned.

The screenshot shows the 'Edit Decision' screen for 'Appointment or Case'. The 'Label' field is set to 'Appointment or Case'. The 'API Name' field is set to 'Appointment_or_Case'. The 'Description' field is empty. Under 'Outcomes', there is one outcome named 'Appointment' with 'Case' as an alternative. The 'Default Outcome' is set to 'All Conditions Are Met (AND)'. A condition requirement is defined: Resource 'A_a How_may_I_Help_you' Equals Value 'A_a Book_an_Appointment'. The 'Delete Outcome' button is visible.

Add Screen Element

- Add a Screen element after the Decision Element, on the Appointment path and label it as "Appointment Booking Screen".
- Click on Fields, click on the record variable input and create a new Resource (AppointmentRecordRes) to display all the fields which are in the Appointment object.
- Drag all the fields which are needed to add on the screen inorder to collect the student information.

The screenshot shows the 'Edit Screen' configuration for 'Appointment Booking Screen'. The 'Components' tab is selected, showing 'Fields' and 'Record Variable' sections. The 'Record Variable' section has 'AppointmentRecordRes' selected. The 'Fields' section lists 'Appointment Date/Time', 'Purpose/Topic', 'Notes', and 'Select Consultant'. The 'Screen Properties' panel on the right shows the 'Label' as 'Appointment Booking Screen' and 'API Name' as 'Appointment_Booking_Screen'. The 'Done' button is highlighted.

Add GET Record Element

1. Add a GET Record Element after Decision Element, under the Appointment path and label it as “Get Consultant Rec”.

2. Select Object : Consultant

Condition Requirement : All Conditions are Met(AND)

a)Field : Name

Operator : Equals

 Value : {!AppointmentRecordRes.PurposeTopic__c}
 Field : Student_Name__c
 Value : {!Get_Rec.Id}

Field	Value
Appointment_DateTime__c	← AppointmentRecordRes > Appointment Date/Ti... X
Consultant__c	← Aa Consultant from Get_Consultant_Rec > Record ID X
Notes__c	← Aa AppointmentRecordRes > Notes X
PurposeTopic__c	← Aa AppointmentRecordRes > Purpose/Topic X
Student_Name__c	← Aa Student from Get_Rec > Record ID X

Add Screen Element

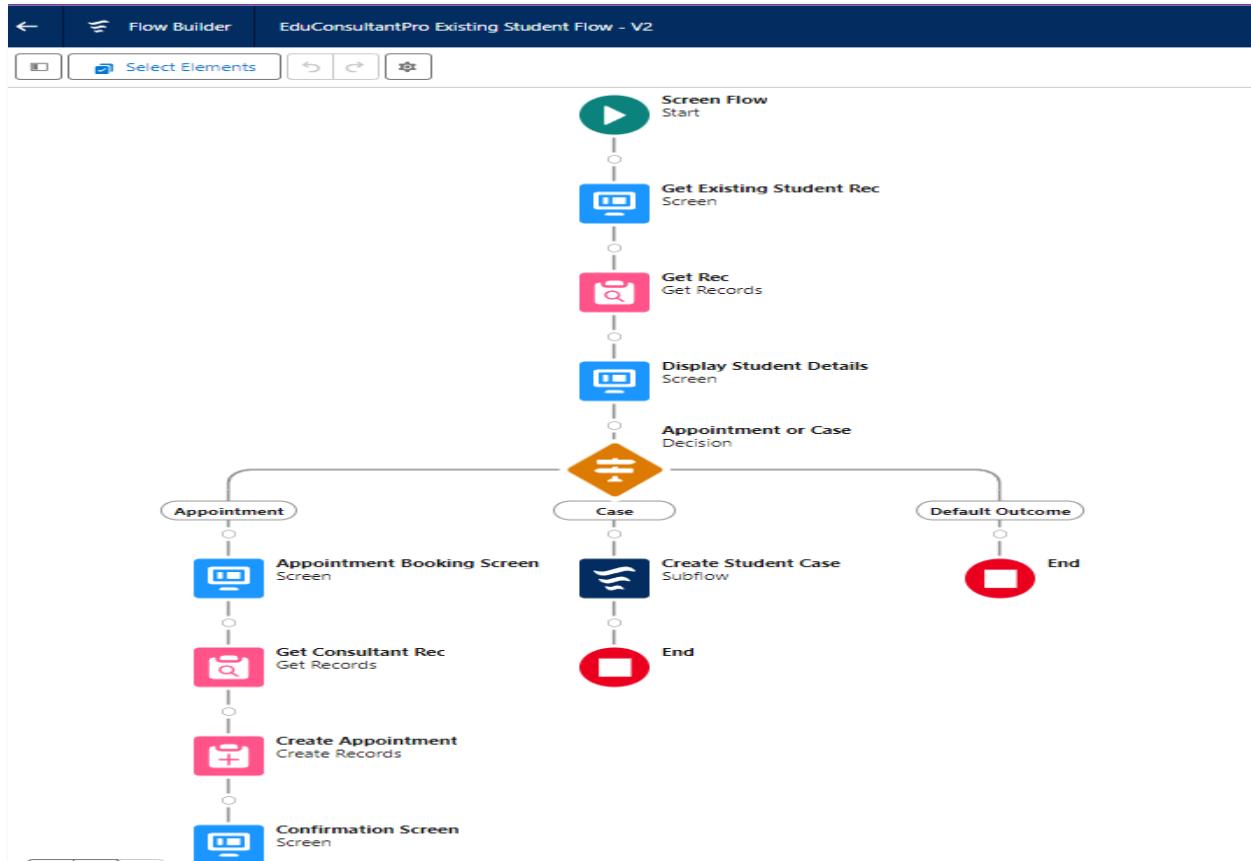

1. Add a Screen Element after the Send Email to Student Action Element, label it as "Confirmation Screen".
2. From the left side panel search for the Display text component and drag it to the main panel, label it as "Appointment_Confirmation".
3. Paste the below in the Resource picker box.

Consultant Name : {!Get_Consultant_Rec.Name},
 Date & Time : {!AppointmentRecordRes.Appointment_DateTime__c},
 Notes : {!AppointmentRecordRes.Notes__c},

Add an SubFlow Element

1. Add a subflow element after the Decision Element, on the Case path and search and Select for “Create a Case”, label it as “Create Student Case”.
2. Save the flow and label it as “EduConsultantPro Existing Student Flow”, you can use the below image for reference.

> Create a ScreenFlow to Combine all the flows at one place

- 1. Flow Selection:** The ScreenFlow starts by presenting a menu where users can choose from various available flows
- 2. Execute Chosen Flow:** Based on the user's selection, the corresponding flow is launched and guided through its steps.
- 3. Completion and Return:** Once the chosen flow is completed, the user is returned to the main menu to select another flow or exit.
- 4. Centralized Access:** The ScreenFlow serves as a central hub for accessing and managing multiple related flows in one place.

Add Screen Element

1. Add a Screen Element and label it as Welcome Screen.
2. From the left side panel search for the Display text component and drag it to the main panel, label it as "SuccessMessage".
3. Paste the below in the Resource picker box.

“Welcome to EduConsultantPro

your premier destination for education and immigration solutions!

At EduConsultantPro, we understand that embarking on educational or immigration journeys can be both exhilarating and daunting. That's why we're here to guide you every step of the way with expertise, dedication, and personalized support.

Whether you're seeking to pursue your academic dreams abroad, navigate the complexities of immigration processes, or enhance your professional skills through international opportunities, EduConsultantPro is your trusted partner.

Our team of seasoned consultants is committed to understanding your unique aspirations and crafting tailored strategies to help you achieve your goals efficiently and effectively. From selecting the right educational institution to navigating visa procedures, our comprehensive services cover all aspects of your journey.

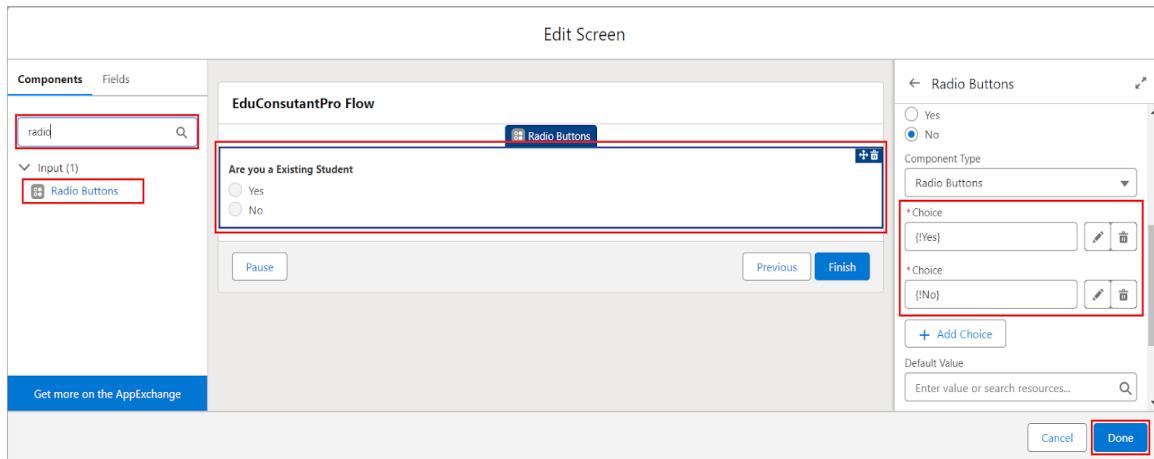

At EduConsultantPro, we believe in fostering inclusive communities and unlocking the full potential of every individual. With our unwavering commitment to excellence and integrity, we strive to make your experience with us seamless and rewarding.

Welcome to EduConsultantPro – where your aspirations meet our expertise, and together, we pave the path to success. Let's embark on this transformative journey together!"

4. Click Done.

Add Screen Element

1. Add a Screen Element after the Welcome Screen Element, label it as "Existing or New Student Confirmation Screen".
2. Add a radio button component from the left side panel, label : Are you a Existing Student
3. Click on Add Choice --> type "Yes" in the input field --> click Create Yes choice.
4. Repeat step 6 and create an "No" choice resource.

5. Click Done.

Add Decision Element

1. Add a Decision Element after Existing or New Student Confirmation Screen Element, label it as "Decision 1".
2. Under outcome label it as "If Existing Student" and write the condition such as below:

Resource : {!Are_you_a_Existing_Student}

Operator : Equals

Value : {!Yes}

3. Click on the “+” icon and Repeat step 2 for No options mentioned.

Add an SubFlow Element

1. Add a subflow element after the Decision 1 Element on the if Existing Student path and search and Select for “EduConsultantPro Existing Student Flow ”, label it as “Existing Student Flow”.
2. Save the flow and label it as “EduConsultantPro Existing Student Flow”.

Existing Student Flow (*Existing_Student_Flow*)

* Label
